Abstracts of International Conservation Literature

www.aata.getty.edu

A free resource for professionals engaged in the conservation and management of material cultural heritage in all its forms: works of art, cultural objects, architectural heritage, and archaeological sites and monuments.

AATA Online includes more than 110,000 abstracts, with new abstracts of both current and historical conservation literature added quarterly.

AATA Online regularly abstracts 150 journals, conference proceedings and monograph series. Hundreds of other publications, both from the field of conservation and from allied fields, are abstracted on an irregular basis by volunteer contributors.

AATA Online includes all 36 volumes of Art and Archaeology Technical Abstracts (AATA), its predecessor, IIC Abstracts, and over 1,600 abstracts published between 1932 and 1955 by the Fogg Art Museum and the Freer Gallery of Art. Also included are all of the original AATA special subjects supplements and additional supplements added since going online.

## Introduction to JAIC's Special Mountmaking Issue

A Method for Invisibly Mounting Costume Using FosShape  
Cynthia Amnéus and Marla Miles  

Short Communication: Improved Mounting System for an Ancient Bronze Torso of a Youth  
BJ Farrar  

New Mounting Systems Provide Mobility for Two Ancient Objects at the Museum of Fine Arts, Boston  
Susanne Gänsicke, Pamela Hatchfield, Jean Louis Lachevre, Craig Uram, and Dante Vallance  

Short Communication: Receiver Systems for Object Mounts: A Design Concept for Safe Installation and Display Flexibility  
Jamie Hascall  

Short Communication: Simple and Invisible Solutions Using Rare Earth Disc Magnets in Mountmaking  
Deanna Hovey  

Short Communication: Exploring Process and Design for Visually Unobtrusive Object Mounts  
McKenzie Lowry  

Short Communication: Cast Bronze Mounts for Temporary Exhibitions at the J. Paul Getty Museum  
Mark Mitton and Adrienne Pamp  

Short Communication: A Support Mount Made from Nomex Card for Storage and Three-Dimensional Display of an Incomplete and Fragile 19th-Century Straw Bonnet  
Luba Dovgan Nurse  

Mount Challenges and Solutions for Native Alaskan Objects for a Study Collection in an Earthquake Zone  
Jonathan Pressler  

Mounting Multiple-Piece Ensembles for an Exhibit of Plains, Plateau, and Great Basin Attire at the National Museum of the American Indian  
Shelly Uhlier  

Guidelines for Authors

INTRODUCTION

Mountmaking Special Issue

This Special Issue of the *Journal of the American Institute for Conservation* is dedicated to the art of exhibition mountmaking, a profession that is inextricably intertwined with conservation. The two fields work toward the same end of safeguarding our museum collections while on exhibit.

Viewed through the lens of preventative conservation, object mounts can be seen as yet another means of safeguarding collections. However, for object mounts to meet this potential, mountmakers must have the opportunity for professional review and debate of mount designs, which this journal provides. We are indebted to the *Journal of the American Institute for Conservation* for this opportunity.

The articles in this Special Issue touch on all aspects of the mountmaker’s craft. Five of the articles present different solutions for mounting objects in metal, ranging from bronze clips to receiver systems to seismic solutions to large sculptures. Creative uses of rare earth magnets in mountmaking are discussed, and three solutions for softer objects that require full support, including mannequins, are presented. A discussion of methods of concealing mounts while maintaining their integrity brings up a challenge familiar to all mountmakers. Our hope is that you read these articles for problem-solving inspiration as much as for learning about new techniques and materials.

Most of the articles in this issue were born from presentations given at the first two International Mountmaking Forums: the first at the J. Paul Getty Museum in 2008 and the second at the Smithsonian Institution in 2010. Besides mountmakers, many conservators and allied professionals attended and participated in these events. The tradition has continued with our most recent Forum in Chicago, Illinois, hosted by the Field Museum, and several museums have offered to host the 2014 event. We hope that this publication is only the beginning of this fruitful exchange between our two professions!

—Shelly Uhlir, BJ Farrar, and McKenzie Lowry
